

## KEY BENEFITS

Permit<sup>®</sup> WG Herbicide, with the mode of action halosulfuron, is an excellent choice for control of hard to manage broadleaf weeds in corn and dry beans. Permit is formulated as an easy-to-use, high-quality WG formulation with low use rates. Excellent fit in a program with Treflan<sup>®</sup> Liquid EC Herbicide for dry bean weed control.

## TECHNICAL INFORMATION

<b>Active Ingredient</b>	Halosulfuron - Group 2
<b>Formulation &amp; Packaging</b>	72.6% Wettable Dry Granular, 12 x 567 g bottles per case
<b>Mode of Action</b>	Absorbed by roots and foliage, then translocated throughout the plant. Symptoms including stunting, interveinal yellowing and terminal bud death.
<b>Registered Crops</b>	Dry Beans (not Adzuki), Field Corn, Sweet Corn, Popcorn, Seed Corn, sorghum, Proso Millet
<b>Application Timings</b>	<p><b>Dry Beans</b> PRE: pre-plant or pre-emergence up to ground crack POST: 2 - 4 trifoliolate leaf, prior to flowering (use NIS surfactant POST in dry beans)</p> <p><b>Corn (all)</b> POST: spike to 10 - 12 leaf (use NIS or COC surfactant in corn)</p>
<b>Use Rates</b>	<p><b>Dry Beans</b> PRE: 47 g/ha (19 g/ac) POST: 47 - 70 g/ha (19 - 28 g/ac)</p> <p><b>Field Corn</b> POST: 47 - 93 g/ha (19 - 37 g/ac)</p> <p><b>Sweet Corn</b> POST: 47 - 70 g/ha (19 - 28 g/ac)</p> <p>Rate is dependent on size of weed at time of application</p>

## CROPS

Dry Beans\*  
Field Corn  
Sweet Corn  
Popcorn  
Seed Corn  
Sorghum  
Proso Millet  
\*Not Adzuki

## WEEDS

Please see product label for complete list of weeds controlled

**TECHNICAL INFORMATION**

<b>Number of Applications</b>	<b>Dry Beans</b> 1 maximum (PRE or POST)  <b>Corn (All)</b> 2 maximum
<b>Tank-Mixing</b>	<b>Dry Beans</b> Apply with Eptam <sup>®</sup> in dry beans as a PPI application for enhanced hairy nightshade and grassy weed control  <b>Corn</b> Apply with any registered post-emergent herbicides including glyphosate
<b>Weeds - PPI or PRE</b>	Volunteer Canola, Cocklebur, Lamb's-Quarters, Wild Mustard, Redroot and Smooth Pigweed*, Common Ragweed*, Sunflower, Corn Spurry, Common Groundsel, Lady's Thumb, Purslane (suppression), Shepherd's Purse, Pennsylvania Smartweed, Common Mallow, Chickweed, Prickly Lettuce
<b>Weeds - POST</b>	Volunteer Canola, Nutsedge, Cocklebur, Wild Mustard, Redroot and Smooth Pigweed*, Common and Giant Ragweed*, Sunflower, Corn Spurry, Lady's Thumb, Shepherd's Purse (suppression), Pennsylvania Smartweed (suppression), Yellow Nutsedge, Milkweed (suppression), Horsetail (suppression)
<b>Re-Cropping</b>	Immediate: Dry Beans 1 month: Field Corn 2 months: Cereals, Seed Corn, Sorghum, Proso Millet 3 months: Sweet Corn 9 months: Alfalfa, Clover, Potatoes, Soybean 15 months: Cabbage, Canola 18 months: Broccoli, Cauliflower, Lettuce, Sunflowers 36 months: Sugar Beets

\*ALS Susceptible Biotypes Only

Weeds and Re-Cropping tables are partial list only - please consult product label for full list of weeds and Re-cropping restrictions

**NUTLET CONTROL OF NUTSEDGE IN CORN**

This photo was taken over 1 year after a Permit WG Herbicide application at post-emergent timing. The field had high nutsedge pressure from a spray miss in corn one year prior.

Permit<sup>®</sup> WG  
 the year prior  
 showing nutsedge  
 nutlet control

Permit<sup>®</sup> WG  
 miss the year  
 prior showing  
 the lack of  
 nutsedge control
