

ENVIDOR 240SC MITICIDE

Envidor 240SC Miticide, powered by the active ingredient spiroticlofen, is a broad-spectrum miticide with activity on key mite pests across many crop groups. Envidor is active against all stages of mites, including eggs, nymphs, and female adults, and has very strong residual activity.

APPLICATION TIMING

Application should be timed to coincide with threshold level in developing mite population. Performance evaluations should be made 7 - 10 days following application.

APPLICATION METHOD

Envidor 240SC should be applied only through properly calibrated ground application equipment. Thorough coverage of all plant parts is required for optimum performance.
