

BROAD SPECTRUM PROVIDES GREAT VALUE

With decades of proven performance, Imidan® WP Insecticide is a great option for apple, cranberry and blueberry growers.

EXCELLENT KNOCKDOWN & RESIDUAL PERFORMANCE

Imidan WP Insecticide provides both quick contact activity on insect targets as well as extended residual control. Also, with minimal disruption to beneficial insects, Imidan is a great option for Integrated Pest Management.

EFFECTS OF PH ON HALF LIFE

Insecticidal activity of Imidan is greatly reduced when the water in the spray solution is pH 6.5 or higher. It is extremely important to test water for pH levels before using for Imidan.

Acidify or buffer the tank mix solution to a pH or lower prior to adding Imidan. LI 700 from UAP is a great option.

pH	5.0	5.5	6.0	6.5	7.0	7.5	8.2
Half Life	178 hrs	92 hrs	36 hrs	14 hrs	10 hrs	2 hrs	33 min
